

## Energy audits

**Stereau Equipements et Services**, an expertise division of Stereau, includes engineers and experts specializing in water treatment plants and drinking water production. As part of its mission, **Stereau Equipements et Services** offers operators energy audits, in partnership with **RIVENTA**, a subsidiary of the Saur group.

Founded in 2006, Riventa specializes in energy optimization for drinking water and wastewater treatment plants, with over 200 projects in 13 countries. Riventa's expertise enables us to maximize the service life of high-power rotating machines, such as pumps, boosters and turbo-compressors, while reducing energy consumption by 5% to 15%.

## How it works

The ISO 17025-certified methodology used by RIVENTA is based on FreeFlow technology, a system for continuously measuring the efficiency of rotating machines.

Against a backdrop of major energy tensions, Stereau Equipements et Services, backed by Riventa's expertise, provides operators with essential added value in optimizing the operation and maintenance of large consumers, with energy savings of up to 15%.
